

The SOVOS Platinum range of Bleed Control Trauma Kits are designed to handle life-threatening haemorrhages, lacerations, burns and minor injuries, providing high-quality medical supplies to meet urgent needs.

The term "Platinum 10" highlights the critical first 10 minutes after a traumatic injury or medical emergency. This window is vital for swift and efficient action by first responders, emergency personnel and potentially the casualty themselves to improve survival rates and minimise long-term harm.

Part Number	SV-95KBC00030	SV-95KBC00040	SV-95KBC00050
